

Dear all,

please find attached a flyer for a training course called "An Introduction to Legal & Industrial Metrology" designed by NPL UK in collaboration with PTB Germany.

I kindly ask you to widely distribute the information through your networks (SADMET, SADMEL, AFRIMETS etc.).

The 10-day-course will take place 7 to 18 June 2010 in the UK. The course is designed for officers or those associated with offices of national metrology organisations that are already working in the field, but wish to deepen and expand their knowledge of legal and industrial metrology or those who are responsible for national metrology legislation.

Sponsorship for the course participation (international travel costs, accommodation, per diem rates etc.) is available through PTB International Technical Co-operation in the framework of German Development Aid, depending on special preconditions.

Interested candidates should send their CV and a covering letter by 31 March 2010. PTB is going to select the appropriate participants then. There will be max. 18 places (also for English speakers in Asia and the Carribean, not only Africa).

For additional informations please find attached the flyer.

Counting on you collaboration for the distribution.

Best regards,

Kathrin Wunderlich
